

EarthBond Asphalt Repair

EarthBond Asphalt Repair Technical Data

Coverage

1 bag = 30 sq. ft. @ 1/4" Thickness
15 sq. ft. @ 1/2" Thickness

Technical Data

Compressive Strength..... (C170) 6,000 PSI
Flexural Strength..... (C880) 1,000 PSI
Abrasion Resistance..... (C1353-96) 20.00
Material Density..... 135 lbs./cu. ft.

CarpenterStone's EarthBond Asphalt repair is a two-component system that takes the guesswork out of delivering consistency... mix after mix after mix.

This engineered cementitious composite needs nothing else to be added and contains no co-polymers or epoxy.

EarthBond Asphalt Repair

A new, revolutionary patch material for longer lasting repairs of asphalt surfaces

carpenterstone®
Improving Products through Advanced Material Science

EarthBond Asphalt Repair is a simple, easy to use patch material for repairing and maintaining asphalt as well as concrete surfaces. This engineered cementitious material utilizes the most current advances in mix design, modern fiber and proprietary cross linking technology, resulting in the only cement based material known to adhere to existing asphalt.

EarthBonds Asphalt Repair is the latest in alternative fuel source materials for our earth conscience world. Through research and development, we have been able to engage these technologies to build a more relevant product containing 100% less fossil fuels than traditional asphalt repair products.

The fibers utilized in EarthBond Asphalt Repair enhance strength and increase flexibility essential for high traffic surfaces and cold winter weather.

EarthBond Asphalt Repair

CarpenterStone's EarthBond Asphalt Repair – a concrete solution for asphalt repair.

- ▶ Superior bonding strength
- ▶ Ten times the strength of asphalt
- ▶ Long-lasting repairs
- ▶ Easy to use
- ▶ Environmentally friendly - no harmful VOC's
- ▶ Ready for traffic in approximately 2 hours
- ▶ Minimal preparation
- ▶ Non-oil based
- ▶ Resistant to water, fuel, solvents, and oil

Environmentally Friendly

CarpenterStone's EarthBond Asphalt Repair is the only known cementitious asphalt repair product that uses no epoxy. This provides superior workability and longer lasting repairs for less, while being good for the environment and for the installer.

Whether subjected to the rigors of ice, snow and snowplows of the North or the torrential rains and harsh sun of the South, this product will significantly outlast traditional asphalt repair materials, saving you time and money.
