

Driveway Renovation

Does your driveway look like this?

Would you like it to look like this?

Less trouble. Less time. Less expensive. Better looking.

A New Age Solution for an Age Old Problem

- **Pour the new topping directly over the old asphalt driveway.**
- **No removal necessary.**
- **Color and stamp with designs to create a wide range of styles.**

What is it and why does it work?

The material is created by using an advanced chemical mixture that allows modern fiber technology to be combined with the raw materials of cement and sand creating a material with twice the strength of standard concrete while demonstrating high tensile and flexural characteristics.

Where can I get it? Call 561-738-6557.

Stamped Overlay...Stronger, Faster to Install

A new cementitious composite for the 21st Century. The Doverra stamped overlay mix

- Has twice the compressive strength of standard concrete.
- Has higher tensile and flexural strength than standard concrete.
- Can be installed over concrete or asphalt.
- Can be installed in thickness of ¼ - 3/8" over concrete and ½" over asphalt.
- Remains in workable a state for approximately 1 ½ hours.
- Can be stamped within 2 ½ to 3 hours.
- Requires no special tools (only regular stamped overlay rakes, trowels, stamps, etc.)
- Can be stained and stamped in the same day.
- Can be driven and parked on it in only three days.
- Uses standard stains and sealers.
- Contains no co-polymers.

Terrazzo Flooring without the Problems

Get the unique designs of terrazzo, inside or outside. Avoid the problems and cost of reisin. Apply a thin topping of 1/4" to 3/8" over an existing underlayment and get the look of terrazzo. Faster and easier to install. Stronger, and less expensive. Don't worry about the cost of petroleum. It's only cement, sand, fiber, and our patented admixture. Add the specialty aggregate that gives you the look and feel that you desire. And, no need to worry about yellowing in the sun. So, use it on your pool deck, your sidewalks, and more.

Here are a few samples with various colors and specialty aggregates. These are only a few of the almost unlimited designs that you can create.
